

Homework of the course Intelligent Solutions in Transportation (KOKA8590)

Everyone must investigate a scientific journal paper according to his/her studies and interests.

Note that you will be rated after your homework.

Homework tasks:

1. Choose one paper which is interesting for you from one of the following journals:
[Transportation Research Part C](#)
or
[IEEE Transactions on Intelligent Transportation Systems](#)
from the period of 2010-2018!
Articles are freely available only from BME IP network: [BME Student Computer Center!](#)
2. Send me the chosen paper for prior confirmation until **19. Mars.**
3. After my confirmation you can start elaborate your homework as follows:
 - Read and *comprehend* your paper.
 - Prepare a résumé of the paper (about 4-5 pages)!
 - The résumé should contain the following subjects: motivation of the paper, solution of the problem, applied methods, achieved results.
 - The résumé has to be sent to my email address until **14. May.**

Dr. Tamás Tettamanti, senior lecturer

Qiong Lu, PhD student

Dept. of Control for Transportation and Vehicle Systems
